The (stormy) sea of suppliers .
Harris, Craig
Canadian Insurance, Nov 1996, p5

The (stormy) sea of suppliers .
ABSTRACT: A bewildering array of " suppliers " stands between the company and customer when it comes to a claim against a property and casualty insurer. The list of suppliers offering either a tangible product or specialized expertise includes: property contractors, appraisers, health care workers, moisture control organizations, home restoration specialists, auto repair/body shops, auto glass firms, tow truck operators, and, most commonly, independent adjusters. To keep claims costs down, some insurers have replaced informal supplier relationships with preferred provider partnerships, whereby the supplier gets a steady volume of work, the customer gets a guarantee of quality, and insurers can control costs and track quality. Government initiatives to regulate supplier groups, such as external accreditation processes, have arisen because preferred suppliers may cut corners or cheat customers, and the fear that small businesses may be deprived...

Directory of risk management information system vendors .
Business Insurance, Dec 6 1993, p29

Directory of risk management information system vendors .
ABSTRACT: This directory of risk management information systems vendors lists companies who produce and supply proprietary software products to corporations in response to their risk management needs. The listings begin with the company name and address, the date the organization began offering risk management information systems and the parent company, if applicable. Information on specific software products follows, average completely installed price, whether the software is sold with or without...

...data classification tool that makes use of technologies like Serial Advanced Technology Attachment (SATA) disk arrays to allow managers to create tiered storage systems on the basis of the data's...

...sensitive and confidential information may be mishandled in such an environment. There are several data classification products currently

available, and they share common features. They all provide a first level of classification...

...whether the files should be included in primary storage or moved to less critical, second-tier storage. All the products offer ways to locate files and permit users and administrators to access them. Some data classification products, like Kazeon IS 1200, provide an additional level of classification through an analysis of the files' text content, creating an index of all managed content. Organizations considering the purchase of data classification products must first determine the kind of information management problem they want to solve, then select a vendor that focuses on that particular problem.

Detailed Description

Detailed Description

... the common code library.

In the preferred embodiment, the ISMS 17 provides the following
databases.

Product / SKU database (catalogue and stock data)

9 Retailer database (participating retailer information)

Shopper database (including user profile information)

Content databases (including matching profiles)

In addition, the ISMS will provide...112, no matter which model is being
used.

3. Page server retrieves the retailer's product catalogue data held
in the retailer's mail site stock database 111. which is updated from
the retailer's

Robert Finley

Claim

... a vendor database at least one vendor which supplies products in said at least one product category, said vendor database including a listing of a plurality of vendors, each of said vendors registered to supply...a vendor database at least one vendor which supplies products in said at least one product category, said vendor database including a listing of a plurality of vendors, each of said vendors registered to supply...a vendor database at least one vendor which supplies products in said at least one product category, said vendor database including a listing of a plurality of vendors, each of said vendors registered to supply...
